> Jiahui Tang

2.2. Count URL Access Frequency (10 points)

Develop a Spark script to find the frequency of each URL in a web server log. The output should be the URLs and their frequency. You can use the `access_log` file from Problem 1.2.

```
$ spark-submit P22_spark.py
```

Submission
- `P22_spark.py`: Spark script
- `P22.pdf`: The command line that you used to execute the job and any information required to reproduce the execution

Command Used:

```
spark-submit P22_spark.py
```

Output:

```
